

Leadership Summit Description

The Michigan Primary Care Association is thrilled to announce a one-day Leadership Summit at the upcoming annual conference! This workshop-style event will have dynamic speakers who will delve into leadership development, change management, and improving workplace culture and well-being. We highly encourage Health Centers to send a team of staff to this unique event, which includes “workshop” time between sessions. During this time, groups can apply their learning by developing a leadership action plan.

We hope that you will join us for this special event and invigorate a leadership culture at your Health Center!

Who Should Attend?

The MPCA suggests that Health Centers should send a team of ideally three individuals, but no more than five, to maximize the benefits of the day. This team should comprise of at least one member from the C-Suite team and a “rising leader”, which refers to someone who is relatively new to leadership, even if they are not currently in a formal leadership position.

How should I prepare for the event?

We recommend that attendees review and bring their HRSA Workforce Wellbeing Survey results report to the event, if they have it. Please note that your survey report will not be shared with presenters or other participants. However, it will be beneficial for your Health Center team during the sessions and when developing a leadership action plan.

The Leadership Summit will feature three tracks of learning on the following topics:

- Leadership Development
- Change Management
- Culture and Well-Being
