# about mpca

## WHO WE ARE, WHAT WE DO

Community health centers have long been the hub of quality care for thousands of Michiganders. Without community health centers, many would be forced to look outside their communities for health care or would have no access to care at all. The Michigan Primary Care Association (MPCA) is the voice of these centers, advocating for and supporting them so they can deliver comprehensive primary and preventive care – improving health for all.

MPCA is a fierce advocate for quality, integrated care. That, combined with our compassion for people, is what drives us to engage at every stage of the health care conversation. We collaborate with lawmakers to shape and strengthen policy, while raising awareness of the value and impact of health centers. Together, we speak for the hundreds of thousands of patients served by health centers and the dedicated teams who care for those patients.

## MISSION

To ensure the delivery of excellent care that advances equitable health outcomes.

## VISION

To ensure the delivery of excellent care that advances equitable health outcomes.

## DRIVING PRINCIPALS

### Advocacy

We champion health and social policies that support health centers and the patients and communities they serve.

### Collaboration

We bring together member organizations to encourage peer sharing and learning and support relationships between health centers and a diverse set of partners to further integration and common objectives.

### Improvement

We support health centers in the continuous pursuit of high-quality, patient-centered services, the advancement of value-based care, and organizational excellence.

### Equity

We endeavor to overcome economic, social, and other barriers to healthcare, reduce preventable health disparities, and contribute to solutions addressing systemic health inequities.

## board of directors

MPCA is guided by a 15-member board of directors composed of representatives from seven regions, the clinical services committee, health center board member committee, and the finance officers network.

The executive committee consists of board president, president-elect, treasurer, secretary, and the health center board member committee chair. The chief executive officer serves on the board and executive committee as an ex officio member.

## mpca staff

Our staff have a diverse set of expertise and are available to assist with a wide range of support needs!

### Staff Directory:

<https://www.mPCA.net/about/staff-directory/>

The fundamental principles on which health centers were established more than 50 years ago set them apart from other providers of health care. Health centers:

- Are located in or serve medically underserved areas or populations.
- Are governed by a community board composed of 51 percent or more of health center patients who represent the population served.
- Provide comprehensive primary health care services as well as support services (e.g., education, translation, transportation) that promote access to health care.
- Offer services to all with fees adjusted based on the ability to pay.
- Meet strict performance and accountability requirements regarding administrative, clinical, and financial operations as established by the federal government.

Michigan health centers are part of a nationwide network of more than 1,400 health centers spread across 50 states and all U.S. territories that provide care to over 31 million people nationwide.

## about health centers

MPCA is the voice of 40 community health centers and five Native American health service providers that provide primary and preventive health care to more than 657,000 patients in rural and urban communities across Michigan. We advocate to influence and advance health policy in Lansing and Washington, D.C., foster collaboration among health centers and with external partners, and support health centers in the continuous pursuit of high-quality, patient-centered services.

Community health centers are local clinics that provide care to people who live in medically underserved areas. Their services are tailored to fit the unique needs of the communities they serve, and provide high-quality, affordable, and comprehensive integrated healthcare to everyone – regardless of who they are, where they come from, or their ability to pay. Many health center patients are low-income and face barriers to care, making CHCs an essential part of the safety net.

Health centers provide cost-effective primary and preventive care, including dental, behavioral health services, substance use disorder treatment, vision, and pharmacy, that helps people get and stay healthy. They also connect their patients to social services, such as food or housing assistance, and enabling services that help them access care, such as transportation or translation. Those factors, combined with the ability to address multiple health needs under one roof, are why health centers are leaders in treating chronic diseases, reducing health disparities, and keeping people out of the emergency department.

### Section 330E Community Health Centers

Community health centers were developed in 1965 in response to community need for improved health services for inner city populations. As part of the federal government's War on Poverty, funding was made available for communities to establish primary care centers to provide comprehensive health services, regardless of the ability to pay. Although there have been many changes to the Health Center Program over the years, its foundation remains the same—to provide high-quality primary and preventive health care to people in rural and urban medically underserved areas. Medical underservice is defined by a shortage of professionals or health services and high rates of poverty and infant mortality. It may also include special considerations, such as lack of Medicaid providers, lack of bilingual services, or a large percentage of uninsured persons.

### Section 330G Migrant Health Centers

Migrant health centers were established in 1962 to provide comprehensive primary care services to migrant and seasonal agricultural workers and their families in a culturally sensitive environment. Like health centers, migrant health centers provide comprehensive health care services to their target population at an affordable price, regardless of insurance status. Migrant health centers use culturally sensitive clinical protocols, bilingual health personnel, and have developed trust within the migrant communities they serve.

### Section 330H Health Care for the Homeless Health Centers

The Health Care for the Homeless program was initiated in 1987 as part of the Stewart B. McKinney Homeless Assistance Act and modeled after a demonstration project jointly funded by The Robert Wood Johnson Foundation and Pew Charitable Trust Act. In 1996, Congress passed the Health Centers Consolidation Act, which combined the Health Care for the Homeless program to the community, migrant, and public housing primary health care programs under a single authority called the Consolidated Health Center Program.

The Health Care for the Homeless program provides federal grants to nonprofit organizations to deliver primary health care and substance abuse services to homeless individuals and families. The Health Care for the Homeless program provides a multidisciplinary approach to the delivery of care by combining systems of primary care, substance use disorders and mental health services, patient management, and education with aggressive outreach.

### Section 330I Public Housing Health Centers

The Public Housing Primary Care Program was established to support the provision of accessible and comprehensive preventive and primary health care services to residents of public housing. Health promotion and disease prevention are emphasized, and primary health care services are provided on the premises of public housing developments or at other locations immediately accessible to residents of public housing.

### Federally Qualified Health Center Look-Alikes

Federally Qualified Health Center (FQHC) Look-Alikes are health centers that have been certified by the Centers for Medicare & Medicaid Services, based on recommendations provided by the Health Resources and Services Administration/Bureau of Primary Health Care, as meeting all Health Center Program requirements. This certification makes them, like Health Center Program grantees, eligible for fair reimbursement through Medicaid and Medicare and for participation in the 340B federal drug pricing program but they do not receive funding under the Health Center Program. They also assist in recruiting and retaining providers through the National Health Service Corps and the State Loan Repayment Program.

### Indian Health Service

The most prominent provider of health services to American Indians is the Indian Health Service (IHS). The IHS provides both direct care and contract care to members of federally recognized tribes on or near federal reservations with comprehensive health care services, which include medical, community health, dental, mental health, and substance use disorder services.

### Ryan White Program, Part C

Health care organizations funded under the Ryan White Early Intervention Services program provide a comprehensive continuum of outpatient HIV primary care services, including HIV counseling, testing, and referral; medical evaluation and clinical care; other primary care services; and referrals to other health services. Community health centers, migrant health centers, and Health Care for the Homeless sites funded under Section 330 of the Public Health Service Act may receive Part C grants.

### What is a Patient-Centered Medical Home?

The Patient-Centered Medical Home (PCMH) is an approach for providing quality, comprehensive, coordinated primary and preventive care to adults, youth, and children. At its heart, this model of care fosters strong relationships with patients and their families to better care for the person as a whole.

PCMHs deliver higher quality care that comprehensively addresses an individual's needs. The intended outcomes of a high-functioning PCMH health center include improved patient outcomes, patient safety, and patient experience. PCMHs can potentially lower costs through the delivery of evidence-based patient care, reducing waste and improving efficiencies, increasing delivery of preventive services, and fostering population health management.

Many of the PCMH goals rely on improved communication and coordination among health care providers and patients and increased patient engagement through a high-functioning medical team.

The Health Resources and Services Administration and the Bureau of Primary Health Care support Health Center Program grantees in achieving PCMH recognition. Eighty seven point five percent of Michigan Primary Care Association members have achieved PCMH recognition and accreditation via the Accreditation Association for Ambulatory Health Care, The Joint Commission, and the National Committee for Quality Assurance. MPCA provides leadership, guidance, support, and customized technical assistance to members to improve PCMH initiatives.

**Never smoke or allow anyone to smoke where medical oxygen is used.**

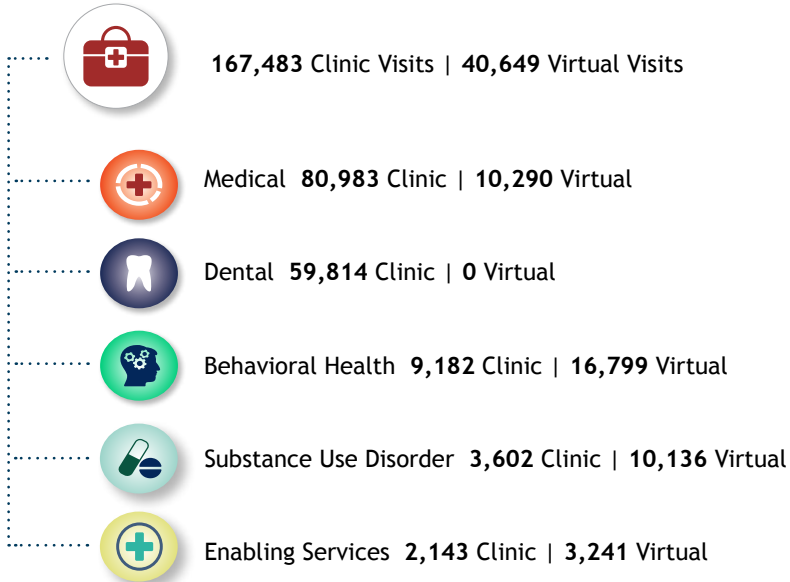

Medical oxygen can cause materials to ignite more easily and make fires burn at a faster rate than normal.

Careless smoking is the leading cause of fatal fires in Michigan.

**GET HELP QUITTING TODAY!**

Call the Michigan Tobacco Quitline at 1-800-QUIT-NOW (1-800-784-8669).

## FIRE ESCAPE PLANNING *for people with mobility issues*

On average you have **less than 3 minutes to escape a home** safely after smoke alarms have sounded. Have a plan designed around your abilities.

### Things to Consider

- Can you get out on your own without equipment or assistance?
- If you need equipment, be sure it is accessible at all times
- If you need someone to assist you, answer the who, what, when, where and how
- Make sure your equipment fits through all exits
- Use a bedroom on ground floor close to an exit if possible
- Install exit ramps or widen doors to make escape easier

**Know Two Ways Out** – Establish two (2) viable ways out of every room.

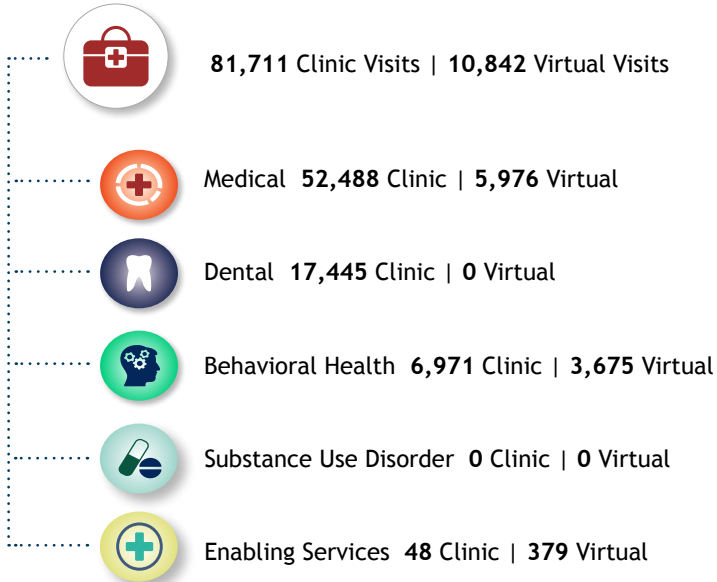

**Involve Others** – Include family, neighbors, friends or a building manager in practicing your escape plan.

**Windows and Doors** – Practice opening locked windows and doors.

**Service Animals** – Be sure to include any service animals in your plan. escape planning.
